The Marbach Literature Museums App

With the Marbach Literature Museums App, visitors can view objects in the permanent exhibition, perform research before a visit, turn the pages of letters, leaf through manuscripts and books, trace objects through the archive, hear stories told and share objects with friends – from home or on site – before, during and after a visit.

The Virtual Literature Museum of the Twenty-first Century in the Museum of Modern Literature is only accessible via the app.

Unfortunately, our app, which was realized in 2015, can no longer be updated for technical reasons. It can only be installed on Apple mobile devices: [App Store / iTunes](#). In the museum, iPads can be borrowed with the app, but unfortunately the scan function can no longer be activated. We apologize for the inconvenience. A

new app and a revision of the permanent exhibition is being planned (launch in November 2021).
